About Us

Our Vision

To be a global leader in renewable energy production, powering a sustainable future through innovative solar technology and unwavering commitment to clean energy excellence.

Our Mission

To deliver exceptional solar products, build a globally recognized renewable energy brand, and foster sustainable growth through responsible manufacturing.

Core Value

At Veda Solar, we are driven by customer centricity, transparency, and an unwavering pursuit of excellence in quality, innovation, and operational efficiency.

Management Policies

Technology Leadership

Investing in cutting-edge manufacturing and advanced solar technologies.

Customer Satisfaction

Prioritizing customer needs through responsive service and quality products.

Continuous Improvement

Driving operational excellence through process optimization.

Environmental Protection

Committed to sustainable manufacturing and clean energy.

People-Centric Focus

Empowering teams with growth opportunities and innovation.

Ethical Integrity

Upholding business ethics and legal compliance.

The Veda Advantage

- 1 Advanced TOPCon Technology
- 2 1.5 GW Manufacturing Capacity
- 3 Consistent Quality & Testing
- 4 Reliable & Timely Delivery
- 5 Strong Supply & Service Network
- 6 High Efficiency & Low Degradation
- 7 Transparent Warranty & Support
- 8 Built for Long-Term Performance

Applications

-  Residential Rooftops
-  Commercial Buildings
-  Industrial Plants
-  Utility-Scale Solar
-  Ground-Mounted Projects
-  C&I Projects
-  Agricultural Solar
-  Infrastructure
-  Hybrid Systems
-  Floating Solar
-  Microgrids
-  EV Charging

Excellence, Consistency, Engineering

Excellence

High-quality solar panels use premium materials, advanced manufacturing, strict quality control, and certified standards to deliver maximum efficiency and long-term durability.

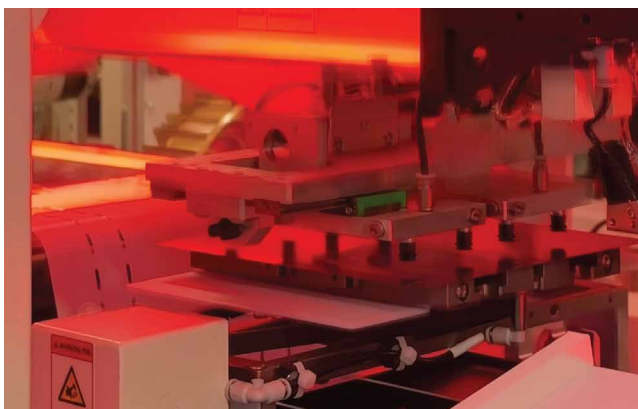

Consistency

Veda Solar panels deliver high efficiency, low degradation, and durable performance, backed by strong warranties and industry standards.

Engineering

Veda Solar leverages advanced technology and strong engineering expertise to deliver innovative, high-performance solar solutions.

Solar Panels For A Sustainable Tomorrow

Advanced Technology, Manufactured in India

Premium solar modules designed for high efficiency, reliability, and trusted Indian manufacturing standards.

Higher Returns, Greater Savings

Smart solar solutions designed to generate more power and deliver reliable output even in low-light conditions.

Globally Recognized Certifications

Certified for superior quality, high performance, and full compliance with international industry standards.

Healthier Planet, Brighter Future

Cutting down carbon emissions and reducing dependence on fossil fuels to create a cleaner, greener world.

Solar Panels For A Sustainable Tomorrow

Hardik Kachhadiya

Director

Hardik Kachhadiya brings 8+ years of solar industry expertise, overseeing end-to-end procurement operations with sharp backend knowledge. Known for building trust-driven partnerships and staying composed under pressure, he lets results speak for themselves, keeping the supply chain running seamlessly.

Hitesh Beniwal

Director

Hitesh Beniwal is a FMS Delhi alumnus with 13+ years of experience in finance. He brings sharp financial acumen and strategic insight, ensuring the company's fiscal operations remain robust, transparent, and growth-oriented.

Keyur Gajera

Director

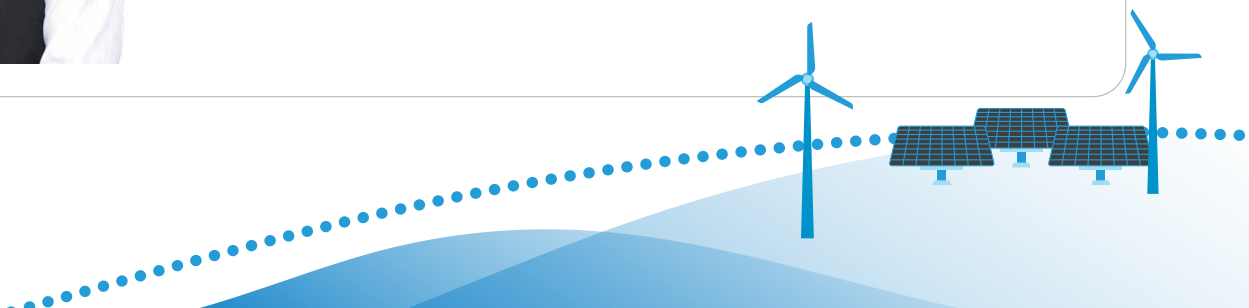

Keyur Gajera brings 8+ years of experience in the solar industry and a natural flair for sales and marketing. He drives business growth through sharp market insight, client relationships, and a results-focused approach that consistently opens new avenues for the company.

Ravikant Beniwal

Director

Ravi Beniwal oversees the company's supply chain, client relations, and customer success, ensuring seamless operations. His hands-on approach and commitment to client satisfaction make him a reliable pillar of the organization's day-to-day excellence.

Over 30 Years

Bi-facial Capabilities

The dual-sided power generation gain is enhanced by exposing the backside to light, leading to a significant reduction in LCOE.

Low Light Performance

Advanced glass and cell surface textured design ensure excellent performance in low-light environment.

Anti PID

Minimizes degradation risks from PID phenomena through optimized cell production technology and stringent material control.

AR Glass For Enhanced Power

Anti-reflective glass (AR Glass) allows more light to pass through the glass.
